Frontend engineer specializing in React Native, TypeScript, and Expo. I combine technical depth with an eye for UX and thrive in collaborative, fast-paced environments. I learn quickly and deliver solutions that are both effective and easy to maintain.

## Work Experience

### Frontend Engineer

Ryt Bank | Kuala Lumpur

Jun 2025 - Present

Build user interfaces and screens for an AI-powered digital bank, focusing on RytPayLater that offers instant credit to our users. Work with design and backend closely on UI and API integrations as well as coordinate across pods to deliver features.

- Build UI components and screens for RytPayLater using React Native and TypeScript.
- Work with designers on UI implementation and design discussions, and with backend engineers on API contracts.
- Coordinate across pods and departments, using strong communication and planning.
- Use Jira and Confluence for ticket tracking and documentation, and prioritize and manage development work through cross-team coordination.
- Use Git for version control and pull request workflows.

### Fullstack Developer

Juta Teknologi Sdn Bhd | Denai Alam

May 2024 - May 2025

Deliver responsive web and mobile solutions with a focus on user experience and system efficiency. Develop and maintain the Juta CRM and build mobile apps such as the CNB Carpets catalogue, collaborating with teams to ship technical solutions.

- Develop and maintain Juta CRM using ReactJS and Tailwind CSS.
- Build a mobile catalogue app for CNB Carpets using React Native and Firebase.
- Establish and maintain efficient Git workflows for version control.
- Collaborate well with peers and cross-functional teams to deliver technical solutions.

### Junior Software Developer

Code Titan Sdn Bhd | Subang Jaya

Mar 2023 - Mar 2024

Lead backend development and UI/UX improvements across multiple applications. Manage the TDLabs backend, redesign the TDLabs website for higher engagement, and improve app efficiency through UX optimization and API integration.

- Manage TDLabs backend system; optimize performance and reliability.
- Redesign TDLabs website, achieving ~20% increase in user engagement.
- Utilizing Figma, we streamlined form-filling processes in the RightOnTrack App, leading to a 15% increase in technician efficiency.
- Expanded technical skill set by integrating APIs, enabling seamless data exchange and enhancing the overall functionality of the application.

## Student Intern

Petronas Digital Sdn Bhd | Kuala Lumpur

Aug 2020 - Oct 2020

- Developed a facial recognition system using Raspberry Pi and Python; presented the project to stakeholders.
- Delivered an end-to-end IoT application in a corporate environment.

## Projects

### Momento

Dec 2024 - Present

A real-time photo-sharing platform that creates private digital spaces for events where guests can instantly upload and interact with photos. Features QR code access, live gallery updates, and social interactions, making photo sharing at events seamless and collaborative.

- Built with React, TypeScript, and Firebase
- Mobile-first responsive design with Tailwind CSS
- User authentication with host/guest roles
- Progressive Web App (PWA) capabilities

## Core Skills
